

TD Series Chemical Metering Pump

FEATURES:

- ✓ 4.3" Color TFT display with intuitive navigation, enabling easy configuration, full digital remote and manual control of advanced pumps and visibility to running status, alarms, logs, and system configurations
- ✓ 4 available sizes with flows up to 16 GPH (60.6 LPH) and up to 250 PSI (17.2 BAR)
- ✓ Rugged construction with NEMA 4X / IP 66 housing for the harshest environments and outdoor use
- ✓ Standard FastPrime™ liquid ends that allow fast and easy priming with integrated bleed valve
- ✓ Agency certifications - NSF 61, ETL, CE, and UKCA

BENEFITS:

- ✓ External Control Inputs - Automate your process with pulse batch modes, 4 analog 4-20mA inputs, remote start/stop, and multiple sensor inputs including tank level indication, auto degassing technology, pressure sensors, leak detection and more
- ✓ Best-in-class electronic components and enhanced control for full SCADA integration and advanced system process control features
- ✓ System & User Totalizers - An odometer for your pump that logs pump strokes, estimated volume, and power cycles – confirm pump operation between visits
- ✓ Calibration Assist – Simply draw from a column and adjust the estimated value on-screen to the measured volume
- ✓ Leak detection sensor integrated into the liquid ends for reliable detection of leaks and output alarms for full safety and system control

Revolutionary FluxDrive™ technology with fractional turndown capability

Reduced weight, increased efficiency, and universal 115-230V, 50/60 Hz power supply

Field upgradable firmware via USB-C drive interface

Download pump data and always ensure the most current feature set and firmware upgrades

Integrated AccuPrime™ and degassing technology

Enables automatic degassing of the discharge line for Stay-Prime functionality
